

Dear Friends,

Holland – biker land

Right now we have beautiful weather. Lots of bikers suiting up for their first ride this year. This means: busy days for the Dutch police. A few more accidents but most off all: a lot more speeding tickets. During your visit be aware of those guys: radar, laser guns, stationary photo equipment and portable equipment. But most of all the fun they have in the police car chasing you. So in the end, we bikers, make at least one group happy using our bikes again.

No this isn't an ordinary dustbin

Fools day

'Be kind for the kid inside you'.

Every year April 1st even grown ups are fooled. It seems in the Netherlands the big companies challenge each other to do the best joke. On national tv the kids-news broadcast an item about a mandatory bathing cap in all swimming pools. The zoo at Arnhem was announcing a muzzle for al their sharks and Akzo-Nobel was announcing a new kind of invisible paint to fool an ATM machine.

April first: a good start of a long, warm, dry motor season with lots of fun and pleasure.

Progress

ProHolland is developing. The progress is a little slow but more important the steps are all towards our one and only goal: a solid business. A business which offers a good price-quality ratio and high service standards. We want happy customers, who leave the Netherlands after 10 days with a mind full of good memories.

We are publishing all over the internet. One of our articles is shown at inter-bike in the United Kingdom. A lot of people support us by exchanging links or even buttons and banners at their websites. And of course the priceless tips and suggestions. Thanks!

We hope the summer will bring only good things to you and your family. To your business and colleagues. Happiness and prosperity.
