

*Unbelievable!!!! and he's Dutch!!*

Egbert van Popta is the new world champion wheelie 2012. For the second time in a row. Last year he did his trick at 269.3 km/h. This year he improved his own record: 272.5 km/h at one wheel.

The World Wheelie Competition in Elvington (Great Brittan) is as famous as the speed records set in Bonneville. It isn't a silly game but a real competition. Competitors from all over the world, some of them prepare all year long, try to be the fastest motorist on one wheel. GSX-R1000, Hayabusa's, ZX-12R and even a special build S1000RR couldn't match with the Suzuki GSX-R1100 turbo powered (a 22 years old ) machine of mister Egbert van Popta. Not a new machine but for sure a fast one.
